FFY2023 Listing of Federally Obligated Projects

Effective Date: December 15, 2023

Prepared by:

NFRMPO

419 Canyon Ave, Suite 300

Fort Collins, CO 80521

Preparation of this document has been financed in part through grants from the Federal Highway Administration, the Federal Transit Administration, and the local member communities of the North Front Range MPO.

Purpose of this Report

The purpose of this report is to identify federal funding obligations for surface transportation in the North Front Range Metropolitan Planning Organization (NFRMPO) region that took place during Fiscal Year (FY) 2023, which covers October 1, 2022 to September 30, 2023.

The Federal Highway Administration (FHWA) defines “obligation” as a legal commitment by the Federal government “to pay or reimburse a State or other entity for the Federal share of a project’s eligible costs.”¹ Obligation occurs when FHWA or the Federal Transit Administration (FTA) approves the project and executes the project agreement, not when cash (or an electronic payment) is transferred. Obligated projects were not necessarily initiated or completed during this year. The obligated amounts reflected in this report also may not be equal to the final project cost.

Background

The [Bipartisan Infrastructure Law \(BIL\)](#) enacted as the Infrastructure Investment and Jobs Act (IIJA), was signed into law on November 15, 2021 and supersedes the [Fixing America’s Surface Transportation Act](#) (FAST Act), a federal transportation funding bill signed into law in 2015. The FAST Act required MPOs to publish an Annual Listing of Obligated Projects ([23 CFR 450.334](#)) detailing which funds have been obligated in the preceding federal fiscal year, as a record of project delivery and progress report for public information and disclosure. The IIJA continues this requirement. The FAST Act was preceded by the Moving Ahead for Progress in the 21st Century Act (MAP-21), which was enacted in 2012. The FAST Act represented the first long-term comprehensive surface transportation legislation since the Safe Accountable Flexible Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) Act in 2005.

The NFRMPO is an association of 15 local governments made up of portions of Larimer and Weld counties, the cities of Evans, Fort Collins, Greeley, and Loveland, and the towns of Berthoud, Eaton, Garden City, Johnstown, LaSalle, Milliken, Severance, Timnath, and Windsor. A representative of the State’s Transportation Commission and Colorado Department of Public Health and Environment’s (CDPHE) Air Pollution Control Division (APCD) are appointed to serve on the NFRMPO’s Council, officially named the North Front Range Transportation & Air Quality Planning Council (NFRT&AQPC).

Every Metropolitan Planning Organization (MPO) is responsible for planning, programming, and coordinating federal transportation investments, along with its partners from state and federal governments and public transit operators. The NFRMPO develops its programs by working with elected officials, staff from local governments, and the public, through a committee system where the committee and Council discuss various issues and make recommendations. During 2023, the NFRMPO active committees included the Finance Committee, HR Committee, Technical Advisory Committee (TAC), and Mobility Committees (Larimer County, Weld County, and Northern Colorado Mobility Committees). Working committees and ad hoc groups are also created and appointed, as needs dictate.

¹ Funding Federal-Aid Highways. <https://www.fhwa.dot.gov/policy/olsp/fundingfederalaid/04.cfm>. January 2017.

Regional Transportation Plan

The NFRMPO develops and maintains a corridor-based Regional Transportation Plan (RTP) with a minimum 20-year horizon. Only projects requiring air quality conformity are identified and modeled. The vision plan and the fiscally constrained plan identify corridor-level improvements, providing greater flexibility during project selection. The fiscally constrained portion of the RTP identifies the regionally significant, multimodal transportation projects which can be implemented by the planning horizon year with financial resources reasonably anticipated to be available. Federal law requires the RTP be updated at least every four years in nonattainment or maintenance areas. The applicable RTP for this document is the [2050 RTP](#), adopted by the NFRT&AQPC on September 7, 2023.

Transportation Improvement Program

The Transportation Improvement Program (TIP) is the adopted list of regionally significant and federally funded roadway, bicycle, pedestrian, and transit projects programmed in the region over the next four years. Projects in the TIP must be consistent with the RTP vision for each corridor, if applicable, before they can be programmed.

Federal rules require the TIP be updated at least every four years, including specific projects and funding pools. In accordance with federal requirements, the NFRMPO's TIP covers at least a four-year period.

The TIP currently in effect is the [FY2024-2027 TIP](#), which was adopted by the NFRT&AQPC on September 7, 2023. Projects included in the FY2024-2027 TIP were eligible to receive federal funds beginning July 1, 2023.

Public Involvement

The NFRMPO actively engages the public in the regional transportation planning process and embraces federal requirements that MPOs provide complete information, timely public notice, full public access to key decisions, and early and continuous involvement in developing the RTP, TIP, and other planning products. The NFRMPO's public involvement strategies include presenting information and educating the public, reaching out to protected and underrepresented populations, continually soliciting public input, facilitating the flow of information between the public and decision makers, and responding to public concerns. Public involvement strategies are discussed in depth in the [2022 Public Involvement Plan \(PIP\)](#), adopted by the NFRT&AQPC on December 1, 2022.

Obligation Report

The project-specific obligation tables in this report are organized by TIP funding category. Nearly all the projects listed in this report are featured individually in the NFRMPO's TIP documents, which are available at nfrmpo.org/tip/. Projects that are not identified individually in the TIP, known as "pool projects", are grouped based on funding type. Each project is listed in the obligation tables with the following information:

- ❖ The **STIP WBS ID** is the work breakdown structure identification number assigned to each project by CDOT and assists with the identification of projects across the TIP and STIP documents.

- ❖ The **Project Code Number** on highway projects is a tracking number assigned by CDOT for financial management purposes. For transit projects, FTA assigns an FTA Subgrant WBS/Project ID.
- ❖ The **Project Sponsor** is the lead agency responsible for initiating, managing, and completing the project and, in many if not all cases, for providing matching funds.
- ❖ The **Federal Obligation** is the federal funding commitment made during FFY2023 (October 1, 2022 – September 30, 2023).
- ❖ The **Federal Request in TIP** identifies all federal funding programmed in current and/or previous TIPs. This information is not available for pool projects. For transit projects that repeat annually, only FFY2023 funding is shown.
- ❖ The **Federal Funds Remaining** is federal funding programmed in the FY2024-2027 TIP for the active years of the TIP. This information is not available for pool projects. For transit projects that repeat annually, only FFY2024 funding is shown.

Some projects include funds from multiple TIP program categories; thus, one project line under one funding source does not necessarily equal the total obligated funding for that project. In these instances, the same project location description will appear in several funding sections of the project listing. For the total obligated in FFY2023 for the project, one must add the funding in each category.

To offset the financial burdens of the COVID19 pandemic, the United States Federal government put into place several stimulus relief bills in FFY2020 and FFY2021. The NFRMPO has obligations for projects utilizing each of the following stimulus relief funds:

- **The Coronavirus Response and Relief Supplemental Appropriations (CRRSA) Act** of 2021 included \$14B to support the transit industry during the COVID-19 public health emergency.
- The **American Rescue Plan (ARP)** of 2021 provided funding to help hard-hit public transit agencies to avoid layoffs and service reductions.

Many transit agency projects funded with ARP funding were not required to be included in the TIP or STIP, which is why the projects with these funding obligations do not have data for the following fields: STIP WBS ID, Federal Request in TIP, and Federal Funds Remaining.

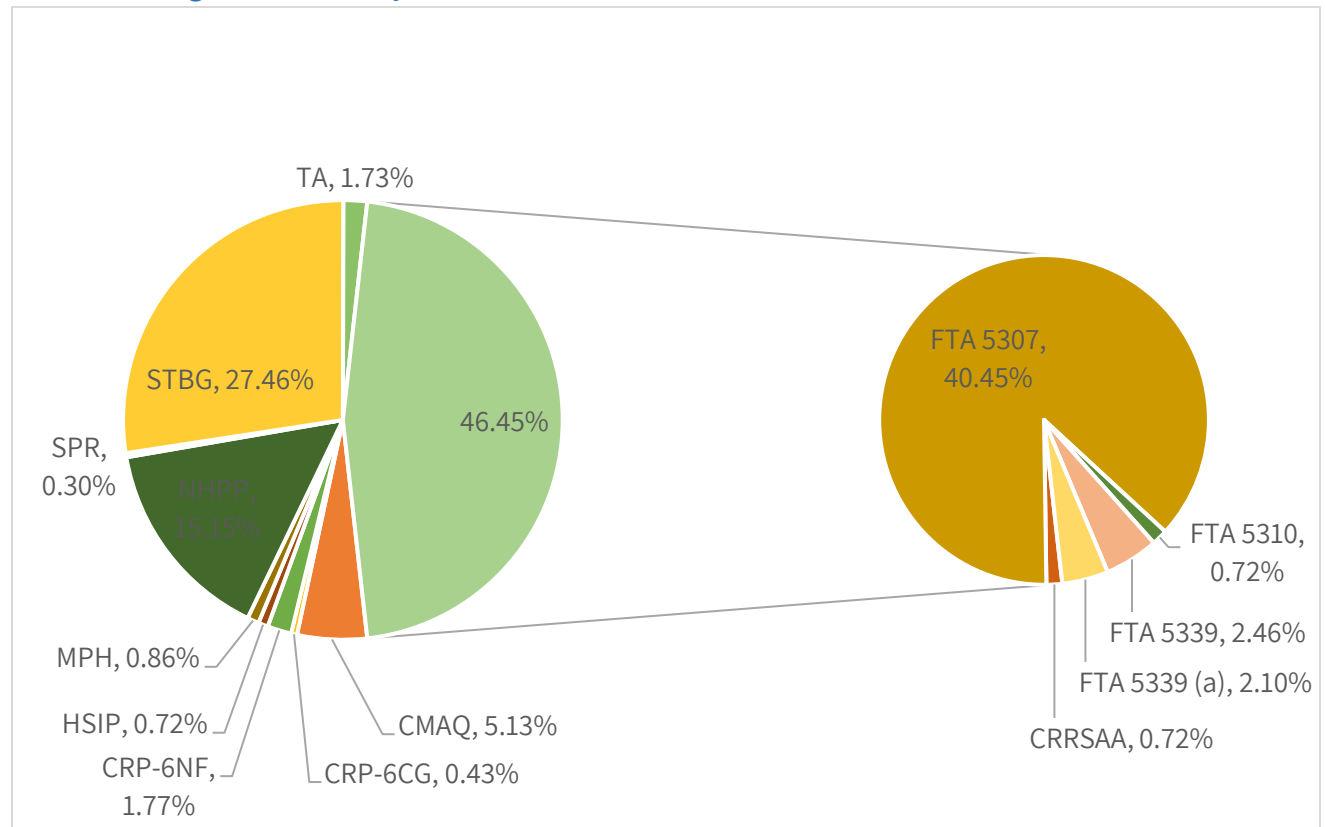

This report also presents figures for reducing federal funds, which is called de-obligation. De-obligation occurs when CDOT reduces or removes a project's federal funds. De-obligation can occur for several reasons:

- ❖ Bids come in lower than the amount obligated for a project. If so, after the project bid is accepted, the federal funds are reduced and shown as a negative obligation.
- ❖ On Advance Constructed projects, amounts being obligated on such projects may need to be adjusted, resulting in the de-obligation of funds.
 - Advance construction allows projects to be funded with Federal-aid dollars at a later date.

- ❖ A project phase (e.g. right-of-way, design, or construction) is closed out causing funds remaining in that phase to be de-obligated. This action must happen before the funds can be obligated to another phase of the same project.
- ❖ After a project has been completed and all bills have been paid, any remaining obligation authority is returned to the Federal government and shown as a de-obligation, or negative number.
- ❖ If a project will not be completed and federal funds were previously obligated, funds for the project are de-obligated.

The following charts and tables are based on records obtained from CDOT, FTA, and/or local transit agencies as the NFRMPO does not participate directly in the obligation process.

FFY2023 Program Summary

Funding Program	Percent of Total Obligation	Federal Obligation
Congestion Mitigation and Air Quality (CMAQ)	5.1%	\$2,541,015
Carbon Reduction Program – Greeley (CRP – 6CG)	0.4%	\$215,285
Carbon Reduction Program – Fort Collins (CRP-6NF)	1.8%	\$876,635
FTA		
FTA-5307	40.5%	\$ 20,054,017
FTA-5310	0.7%	\$354,839
FTA-5339	2.5%	\$1,221,565
FTA-5339(a)	2.1%	\$1,043,000
CRRSA	0.7%	\$356,194
Highway Safety Improvement Program (HSIP)	0.7%	\$856,084
Metro Planning (MPH)	0.9%	\$425,555
State Planning and Research (SPR)	15.2%	\$7,509,123
Surface Transportation Block Grant (STBG)	0.3%	\$150,000
Transportation Alternatives (TA)	27.5%	\$13,615,490
Total:	100.0%	\$49,524,878

Appendix A: Highway Funding Pool Descriptions

Congestion Mitigation & Air Quality (CMAQ) funding covers activities and projects that reduce transportation-related emissions in nonattainment and maintenance areas for ozone, carbon monoxide, and small particulate matter. Federal regulations for this program give priority in distributing CMAQ funds to diesel engine retrofits, and other cost-effective emission reduction and congestion mitigation activities which provide air quality benefits.

Carbon Reduction Program (CRP) provides funds for projects designed to reduce transportation emissions, defined as carbon dioxide (CO₂) emissions from on-road highway sources. Two types of CRP funds are available in the NFRMPO region: 6NF which is the Fort Collins Urban Area allocation and 6CG which is the Greeley Urban Area allocation.

Metropolitan Planning (MPH) funds are allocated by formula and assist MPOs with the continuing, cooperative, and comprehensive planning processes that produce periodic updates of their long-range, multi-modal RTPs and short-range TIPs, along with related studies. The MPO's Unified Planning Work Program (UPWP) addresses a wide range of tasks which use Metropolitan Planning funds.

National Highway Performance Program (NHPP) provides funds for the condition and performance of the National Highway System (NHS) and for the construction of new facilities on the NHS.

State Planning & Research (SPR) - This set-aside program funds statewide planning and research activities to establish a performance-based cooperative, continuous, and comprehensive framework for making transportation investment decisions.

Surface Transportation Block Grant (STBG) provides flexible funding for a variety of projects, including roadway preservation, roadway improvement, bridge and tunnel projects, pedestrian and bicycle infrastructure, transit capital projects, and transportation planning studies. These funds may be used for any roads functionally classified as collector or above including National Highway System (NHS) roads. STBG funds are allocated to the following state funding programs administered by CDOT which had obligations in FFY2023: Surface Treatment, Bridge Off System, Hot Spots, Traffic Signals, and Safe Routes to School.

Transportation Alternatives (TA), also known as the TA Set-Aside, authorizes funding for smaller-scale programs and projects including pedestrian and bicycle facilities, recreational trails, Safe Routes to School (SRTS) projects, community improvements such as historic preservation and vegetation management, and environmental mitigation related to stormwater and habitat connectivity.

Appendix B: Transit Funding Pool Descriptions

American Rescue Plan (ARP) of 2021 provided funding to help hard-hit public transit agencies to avoid layoffs and service reductions and was distributed to transit agencies based on FTA formula funding.

The Coronavirus Response and Relief Supplemental Appropriations (CRRSA) Act of 2021 included \$14B to support the transit industry during the COVID-19 public health emergency.

FTA §5307 – Urbanized Area Formula Program funding is distributed by formula to transit agencies in urban areas over 50,000 in population and can be used for transit studies, capital investment in buses and fixed guideway systems, construction and maintenance of passenger facilities, and security equipment. §5307 can cover operating costs in urban areas with populations under 200,000 and small bus systems operating in larger areas.

FTA §5310 – Enhanced Mobility of Seniors and Individuals with Disabilities Program funds projects to remove barriers to transportation service and expand mobility options. Eligible projects include both traditional capital investment and nontraditional investment beyond the Americans with Disabilities Act (ADA) complementary paratransit services.

FTA §5339 – Bus and Bus Facilities Program provides capital funding to replace, rehabilitate, and purchase buses and related equipment, and to construct bus-related facilities. Eligible recipients include designated recipients and states that operate or allocate funding to fixed-route bus operators, and public or nonprofit agency sub recipients engaged in public transportation, including those providing services open to a segment of the general public as defined by age, disability, or low income.
