

Mobility and Access Priority Group (MAPG) Walk Audit
June 2, 2022

Directions: Please fill out the following walkability assessment areas in each category to indicate any problems, issues, or positive features in the built environment along the route your group took. Please check problems that apply on the route assessed for each category. Please note comments of major problems and their location (be descriptive of location, if possible) on the right side of each assessment category.

At the end of your route/walk, please give each category an overall assessment score between 0 and 10. An overall score of "0" indicates the worst conditions possible and an overall score of "10" indicates the best possible conditions. Please also have at least one group participant utilize the NFRMPO Hazard Reporting Tool (QR code above) on their phone as an additional method of providing feedback on issues experienced while walking.
